For Immediate Release

Hydro Dynamics, Inc. Videos Viewed Over 700,000 Times

Hydro Dynamics, Inc. (HDI) of Rome, Georgia would like to announce that its cavitation videos posted through its website have been viewed over 700,000 times. Specifically, the generic cavitation demonstration has been seen half a million times alone. Video is becoming commonplace on the web to quickly convey information to customers. HDI has found these videos are one of the best tools in explaining cavitation inside the ShockWave Power Reactor (SPR). All of our videos have been consolidated on a new “video” page <http://www.hydrodynamics.com/about-us/videos>. HDI looks forward to posting more videos in the coming months.

See the Action of Cavitation in Our Clear Demo Unit

(This is a rotor spinning in water at 3600 rpms in a clear acrylic housing that is stilled by a stroboscope. You will see the action of cavitation in the bottom of each of the holes.)
