For Immediate Release

Hydro Dynamics, Inc. Releases New Biodiesel Video

Hydro Dynamics, Inc. (HDI) of Rome, Georgia would like to announce that a new video demonstration the excellent transesterification ability of the ShockWave Power Biodiesel Reactor (SPR) is now online. This video can be found on our revised biodiesel section of our website at <http://hydrodynamics.com/biodiesel-reactors/biodiesel-transesterification/>.

Although not a complete replacement for seeing the technology in person, video is becoming commonplace on the web to demonstrate technology and quickly convey information to customers. Our other SPR cavitation videos have been viewed over 750,000 times showing everything from simple cavitation bubbles to gas-liquid mixing to an ethanol extraction animation <http://hydrodynamics.com/about-us/videos/>.

The ShockWave Power™ Reactor (SPR) is manufactured by Hydro Dynamics, Inc., a world leader in process intensification reactors. Together with World Energy, Hydrodynamics, Inc. offers reactor systems to the biodiesel industry for every size of plant and the expertise in biodiesel processing necessary to implement ShockWave Power™ Reactor in any new or existing biodiesel production facility. With over 500 million gallons of annual reactor capacity now sold, the ShockWave Power Reactor is setting a new standard for efficient biodiesel production. To learn more about our biodiesel reactors, please go to our biodiesel page, <http://hydrodynamics.com/biodiesel-reactors/>.
