For Immediate Release

## **New Video of Biogas Skid Incorporating Cavitation Reactor by HDI**

Hydro Dynamics, Inc. (HDI) of Rome, Georgia would like to announce that a new video is available showing its cavitation technology incorporated into a biogas skid engineered by Three-Es at <http://www.youtube.com/watch?v=t35lJ5pZ0wQ>. HDI has partnered with Three-Es of Milan, Italy for distribution of its ShockWave Power Reactor (SPR) for biogas under the BioSPR marketing banner. In biogas waste food and agricultural products are converted to natural gas through bacterial digestion with the BioSPR offering improved yield, viscosity and plant performance.

"This is another example of a beautifully engineered SPR solution from Three-Es", said Doug Mancosky, VP of R&D for HDI. "Three-Es has constantly been evolving its BioSPR skids, improving with each iteration." More information about Three-Es and the BioSPR can be found on their website at <http://www.miscelatori-omogeneizzatori.it/>.
