Biogas Enhancement Technology by Hydro Dynamics to be Displayed March 5-7 at BioEnergy Italy

Hydro Dynamics, Inc. (HDI) of Rome, Georgia would like to announce that its partner Three-Es S.r.l. (Three-Es) of Milan, Italy will be exhibiting the ShockWave Power Reactor (SPR) at a biogas event in Europe this week. Biogas is the production of methane through the digestion of mostly waste materials. The BioEnergy Italy exhibition (<http://www.bioenergyitaly.com>) will take place in Cremona, Italy from March 5th to 7th of 2014. Last year the BioSPR won the “Targa Beltrami 2013”, a prestigious prize for the innovation in technical equipment for energy production from renewable sources, at the same show.

Marketed as the BioSPR for the biogas industry (www.biospr.it), Three-Es will have a complete skid on display as well offering shuttle service to a nearby BioSPR commercial installation. The BioSPR has shown gas yield increases over 20%, dramatically decreased viscosity offering superior plant performance and better feedstock flexibility. The SPR is especially well suited for biogas and other biofuels and biogas represents an exciting new dimension to the SPR biofuel portfolio. To learn more about our biofuel efforts go to (<http://hydrodynamics.com/markets/alternative-energy/>).

Three-Es Bio-SPR Stand:

8 Redmond Court, Rome, Georgia 30165 · 706-234-4111
